Storm Water Management Plan

### Storm Water Management

**Program Overview**  
Oconee County's Storm Water Management Program was created in 2004 to comply with phase II of the National Pollutant Discharge Elimination System, part of the Federal Clean Water Act, that requires local governmental agencies to obtain a permit and monitor the storm water runoff in their jurisdictions.

**Purpose**  
The purpose of the program is to reduce water pollution caused by storm water runoff. Sweeping pollution at its source is the most effective way to prevent harmful pollutants from being washed by storm water runoff into our storm drains, and ultimately, our rivers and creeks. Our program consists of six elements:

- Public Education and Outreach
- Public Participation
- Erosion Prevention and Stabilization
- Construction Best Management Practices
- Post-Construction Best Management Practices
- Pollution Prevention and Good Housekeeping
